DETAILED ACTION

Drawings

The corrected or substitute drawings were received on 5/6/2003. These drawings are acknowledged.

Double Patenting

A terminal disclaimer with regard to U.S. Patent No. **5,895,406** and U.S. Patent No. **6,162,243** is expected in response to this "Office Action".

Specification

The amendment filed 7/6/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: page 6, line 9, the recitation : -- As will be seen herein, the waves described in the current stent are curved, without any straight sections.-- . Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by SIMON et al. (5,354,308).

As to claim 21, SIMON (Fig. 1-5) shows stent 14. Stent 14 comprises wire 4 defining longitudinal wave struts with links 6 for maintaining the struts in a tubular structure. The frequency of the struts at the two ends of the stent is greater than the frequency of the struts in the intermediate section of the stent (Fig. 4).

As to claim 22, SIMON (Fig. 5) shows stent 14 having links 6 axially displaced in the manner as recited in the claim.

Response to Arguments

Applicant's arguments filed 2/1/2008 have been fully considered but they are not persuasive. The Applicant argued that the original drawings, such as Figs. 4, 6 and 7 show no straight sections. However, from Fig. 7, for example, one can recognize straight sections in the stent between peaks and troughs sections.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.
